

FOUNTAIN CENTERS

A Mayo Clinic Health System program for substance abuse and addiction.

Funding for Chemical Dependency Treatment

Fountain Centers accepts payment from commercial insurance, private pay and the Consolidated Chemical Dependency Treatment Fund (CCDTF) and participates in most Southern Minnesota provider networks. Prior to admission, funding must be verified and preauthorization, if required by payer, must be completed. Payment arrangement will be made before discharge and may include payment in full, arrangements for divided payments to Albert Lea Medical Center over a maximum of six months, or assistance with obtaining a medical loan from a lender if a longer period of repayment is required. For self-pay individuals, a down-payment of one third of the estimated cost of services is required.

Minnesota residents ages 17 and younger may be eligible for the Minnesota Consolidated Chemical Dependency Treatment Fund (CCDTF). This fund is accessed through chemical dependency assessors in the county of residence. This process is known as a Rule 25 assessment. The CCDTF incurs no cost to the family.

Mark Donaldson Patient Support Fund

The Dr. Mark Donaldson Fountain Centers Patient Support Fund was established to assist those whose financial situations prevent them from receiving chemical dependency treatment. Funds are used for eligible patients or their family members to help with treatment costs or other necessary support items or services.
